<Invitation to Volunteer as Engineering Programme Accreditors>

(addressed TO ALL MEMBERS OF IEM)

Dear Sir/Madam,

Invitation to show interest to become a member of IEM-EAB Accreditation Teams being constituted for training and capacity building for the subsequent conduct of accreditation of engineering degree programmes to Washington Accord standard.

In the aftermath of the establishment of an Engineering Accreditation Board by the IEM, the latter has been searching for and is continuing its search for professionals from the industry and the academia likely to satisfy the desired profile for training and subsequent service as Accreditors for accrediting engineering degree programmes to EAB's standards and criteria (which shall not be lesser than Washington Accord standard). Since the professional standing and competence of IEM/EAB accreditors will most likely constitute a critical element, among other equally critical requirements, in the evaluation of IEM's eventual application for membership of the Washington Accord, IEM wishes to secure the support of persons best suited for EAB's purposes and with the right motivation.

Towards the above objective we would like you to consider the attached/enclosed documents:

- (a) the Guidance Paper on the Criteria for Accreditors (ANNEX I)
- (b) the Nomination Form (ANNEX II)

If you consider you have suitable qualifications and are willing to submit yourself for training and thereafter making yourself available for conducting accreditation assignments for which you may be designated by the EAB.

You will observe that in Section A of the Nomination Form you should provide particulars relating to your educational attainments and professional standing.

In Section B, you should provide information about the experience acquired, post qualification, whether within the Academia or Industry (including the Infrastructure or Utilities sectors), or in both sectors if applicable.

In Section C, you are required to advise us of your commitment or agreement to serve as an Accreditor of the EAB for which purpose we have supplied some information in the 'Notes' accompanying this Invitation Letter.

As an eventual Accreditor you will be serving the profession without expectation of any remuneration other than being refunded of expenses you may incur.

Thanking you
Regards,

(D . L . DHONDEE)

Notes to Potential Accreditors

Invitation to Volunteer as Engineering Programme Accreditors

1. Please feel free to fill the associated form in MS Word or any text editor and forward by e-mail.
2. You may, if you wish forward any mail version of your full CV but should still complete this form.
3. (a) IEM may use the information you supply on this form as well as in your CV when producing documentation highlighting the quality of the Accreditation Teams composition. It is a requirement of Washington Accord that the qualifications and training (in accreditation) of our Accreditors be included in our application. We hope you will not have any objection to that.
- 3.(b) You may edit the format, but kindly ensure the elements of information requested are supplied.
4. Implications for selected candidates:
 - 4.(a) Nominees should be willing and prepared to undergo the training and attend the workshops and sessions for such purpose (typically two to three-day programmes periodically) locally or overseas as IEM may arrange, including participating as observers in accreditation assignments being conducted by a Washington Accord body, as part of the Nominees’ training (at the cost of the EAB), and subsequently their participating as an EAB Accrerator/Head of Accreditation Team in connection with any engineering degree programme for which EAB has received a request and performing the incumbent duties. In practice this could imply about four (4) days activities including time for briefing by the EAB, scrutiny of the documentation submitted by the Engineering Faculty/Department Head of the HEI, establishing the work programme for a Visit to the Faculty, Meeting with staff and students, examining evidence made available and requested by the Visiting Team, Writing Report of Visit, Reporting to the EAB, and thereafter standing by for information or clarification that the EAB may require towards its decision on the Report, etc., for each programme being accredited.
 4. (b) members of Washington Accord (including future IEM Accreditors, if and when IEM-EAB successfully obtains admission as a Signatory of the Accord, may be designated to serve as Mentors, Nominators by Washington Accord to serve as mentor or Nominator for new applicants for provisional membership of Accord or as Mentors or Reviewers for applicants desiring upgrading to signatory status or even as Reviewers for existing Washington Accord Signatories seeking renewal of their signatory status.
 - 4.(c) all Accreditors (of every Washington Accord member) are volunteers putting their knowledge and experience at the service of the profession, and work against refund of expenses, without expectation of remuneration for services rendered as accrerator.

Appended : Criteria for Accreditors (ANNEX I) & Nomination Form (ANNEX II)
